URP MATERIAL SETUP

The current texture pack has example wallpaper materials that are already configured for Unity URP.

Roughness maps are included as bonus source maps and are not assigned to the example ready-to-use URP materials.

HOW TO USE FOR URP

1. Select one of the included wallpaper materials.
2. Drag and drop the material onto your wall or other mesh.
3. Adjust the material Tiling values if necessary to match the scale of your scene.

You can also open the included Demo Scene to preview the materials in use.

The Wallpaper Panel Prefab can be used as a quick example surface for testing the wallpaper materials.

FOR ANY OTHER RENDER PIPELINE YOU HAVE TO CREATE NEW PIPELINE-SPECIFIC MATERIALS AND ASSIGN THE TEXTURES FROM PACK TO THEM

TEXTURE NOTES

All wallpaper textures are seamless and designed for repeating/tiled use.

Base Color textures use 2K resolution.
Supporting PBR maps use 1K resolution.

RENDER PIPELINE

The current pack has examples for Universal Render Pipeline (URP).

ALL TEXTURES ARE COMPATIBLE WITH BUILT-IN, URP AND HDRP RENDER PIPELINES
